SUMMARIZING SKILLS – WRITING A SUMMARY – AN ABSTRACT

14th October 2025

SUMMARIZING SKILLS

- 1. Identifying main ideas = core points, omitting non-essential details
- 2. Note-taking
- 3. paraphrasing
- 4. Synthesizing Information = combining findings from multiple sources
- 5. Structuring summaries = organizing information logically (background, findings, implications)
- 6. Abstract Writing = concise overview of entire papers
- 7. Using technical language = communicating complex ideas in a simple way
- 8. Referencing accurately = citing sources appropriately

Identifying main idea

- Artificial Intelligence (AI) refers to the simulation of human intelligence in machines that are programmed to think and learn. Over the past decade, AI has seen rapid advancements, particularly in areas such as natural language processing, computer vision, and robotics. These technologies are increasingly being integrated into everyday life, from voice assistants like Siri and Alexa to self-driving cars and medical diagnostic tools. While AI holds great promise for improving efficiency and productivity, it also raises ethical concerns regarding data privacy, job displacement, and decision-making transparency. As AI continues to evolve, it is crucial for governments, researchers, and industry leaders to collaborate on creating responsible guidelines for its development and use.

Identifying main idea

- Artificial Intelligence (AI) refers to the simulation of human intelligence in machines that are programmed to think and learn. Over the past decade, AI has seen rapid advancements, particularly in areas such as natural language processing, computer vision, and robotics. These technologies are increasingly being integrated into everyday life, from voice assistants like Siri and Alexa to self-driving cars and medical diagnostic tools. While AI holds great promise for improving efficiency and productivity, it also raises ethical concerns regarding data privacy, job displacement, and decision-making transparency. As AI continues to evolve, it is crucial for governments, researchers, and industry leaders to collaborate on creating responsible guidelines for its development and use.

Synthesizing Information

- Study X: Online learning boosts flexibility.
- Study Y: Online learning reduces social interaction.
- Study Z: Hybrid models offer the best of both.

•While online education provides flexibility (Study X), it may hinder student engagement due to reduced social interaction (Study Y). A hybrid approach that blends online and in-person learning (Study Z) may effectively combine flexibility with interpersonal connection.

Synthesizing Information....Contd.

- Source 1: Rising temperatures impact crop yields.
- Source 2: Drought frequency is increasing.
- Source 3: Farmers are adopting new irrigation techniques.
- The combined effects of rising temperatures and more frequent droughts are threatening agricultural productivity (Sources 1 & 2). In response, many farmers are adopting innovative irrigation methods, indicating a shift toward more adaptive farming strategies (Source 3).

Synthesizing Information...Contd.

- **Source A:**T20 leagues like the IPL have increased global viewership and brought new fans to the game.
 - **Source B:**Test cricket is losing popularity, with declining attendance and fewer matches scheduled.
 - **Source C:**Players are increasingly choosing T20 contracts over national duty due to higher pay and shorter commitments.
 - **Source D:**Cricket boards are trying to preserve Test cricket by introducing innovations like the World Test Championship.
-
- T20 cricket has boosted global popularity (A), but it's also led to a decline in Test match interest (B). With players favoring shorter, more lucrative T20 contracts (C), cricket boards are now promoting initiatives like the World Test Championship to preserve the traditional format (D).
 -

• *Example:* Data were collected using surveys and analyzed through regression models.

ABSTRACT

A brief summary of the entire research, in one paragraph

- **KEY ELEMENTS OF AN ABSTRACT**

- 1. **Purpose / Objective** (main aim of your research)
 - Example: "This study investigates the impact of..."
- 2. **Background / Context** (Why the topic is important)
 - Example: "Due to rising global temperatures..."
- 3. **Methods** (How did you conduct the research)
 - Example: "Data were collected using surveys and analyzed through regression models."
- 4. **Results / Findings** (What did you discover)
 - Example: "The results showed a significant correlation between..."
- 5. **Conclusion / Implication** (What do the results mean? Why do they matter?)
 - Example: "These findings suggest that early intervention can reduce..."

SAMPLE ABSTRACT

- This study explores the effects of T20 cricket on the popularity and scheduling of Test matches worldwide(*Purpose*). With the rise of franchise leagues like the IPL and Big Bash, cricket's audience has rapidly shifted toward shorter, entertainment-driven formats (*Background*). The research uses a mixed-methods approach, combining viewership data from 2010–2024 with interviews from 20 international players and five cricket board officials. (*Methods*). Findings indicate a steady decline in Test match attendance and broadcasting hours, with 65% of players favoring T20 leagues for financial reasons (*Results*). These results suggest that without structural reforms and better incentives, the traditional format may lose its relevance in the near future. (*Conclusion*)

TIPS FOR WRITING ABSTRACTS

- **Keep it concise** (typically 150–250 words).
- **Use past tense** for methods and results. (Keep it flexible)
- **Avoid jargon** or unexplained abbreviations.
- **Write it last**, after finishing your paper.
- **Do not include** citations or detailed background info.
