Assignment # 01

Opportunity Evaluation for My Business Idea

1. What is my business idea?

Ans My business idea is DialDine, an AI-powered customer care and order-taking system for restaurants. It answers customer calls, takes orders, provides menu details, and manages reservations automatically, 24/7. The system replaces human receptionists and helps restaurants avoid missed calls, reduce labor costs, and improve customer experience.

2. Why is it an opportunity not just an idea?

Ans DialDine solves a ~~p~~ real, painful problem; like restaurants lose customers and revenue due to missed calls ~~at~~ and slow manual orders handling. The demand for automation is rising, and restaurants actively look for cost-effective solutions. It has a clear target market, revenue model, and strong adoption potential, making it a genuine

business opportunity, not just a basic idea.

3. How & DialDine meets the four essential qualities of an opportunity?

Ans. Attractive:

- Restaurants want faster customer service and fewer missed orders.
- DialDine cuts labor cost, works 24/7, and increase customer satisfaction.
- The value proposition is strong: more orders + lower costs + no human errors.

Timely:

- AI adoption is rapidly increasing in the food and hospitality industry.
- Rising labor costs and staff shortages make automation necessary.
- Business today prefer smart, integrated digital tools for efficient operations.

Durable:

- Demand for faster customer service will continue in the long run.
- AI voice agents will become a permanent part of business operations.
- Restaurants will keep upgrading their tech, giving DialDine long-term relevance.

Date: _____

Day: _____

Value-Creating:

- DialDine reduces staff workload and saves money on salaries.
 - Customer get instant responses, accurate orders, and a better experience.
 - Restaurants earn more revenue by eliminating missed calls during peak hours.
-
